### ACADEMIC PROJECTS

- ❖ **Blood Donation Data Management - Web Application**  
This web application allows us to manage donor data. We can add, update, delete, and filter information by blood group and city. I developed it using Web Forms, Grid View, validation, and an SQL database with ASP.NET and C#.

- ❖ **Expense Management – Web Application**  
In this project, users can add expenses by category and date. They can view daily, monthly, yearly, and total expenses on the home screen and filter the data by category and date. Admins can add or remove users and categories. I built it using PHP, HTML, CSS templates, and some JavaScript.
